

*Does your work area need a face lift, but you are concerned that painting will disrupt the work flow? **Electrostatic Painting with NuCharge It™ is the most effective way to improve appearance and hold costs in line and here's why.***

NUCHARGE IT™ ELECTROSTATIC EPOXY is a 2-part Polyamide Epoxy that dries by chemical reaction creating a superior, high performance coating. This product was formulated for interior use on various metals, to include *office furniture, bathroom partitions, school lockers, medical equipment, kitchen appliances and machinery.* When fully cured, it offers a finish that is comparable to a **baked-on-finish** and is resistant to many chemicals, acids & detergents. NuCharge It Epoxy is offered in many custom colors, semi or full gloss, and can be applied by electrostatic, conventional or airless spray.

NUCHARGE IT™ ELECTROSTATIC ENAMEL is a single package High Performance Modified Acrylic that was formulated to be used interior or exterior to include use on same substrates as described with our popular epoxy as well as many outdoor applications.

NUCHARGE-A-THANE is a superior High Performance 2-part Acrylic Urethane that combines superb corrosion and chemical resistance with exceptional weatherability and gloss retention. This is the product of choice for exterior work when long-term exposure is a must. Great for outdoor furniture, recreational equipment, fences, heavy equipment and machinery of all types.

All of the above products offered in many custom colors as well as our stock colors. Color Cards are

available upon request.

NuCharge It™ Primer Sealer is a Universal Primer that acts as a sealer and primer. This product may be used over sensitive paints where blistering would be a concern and allow itself to be top coated with a high performance finish.

NuCharge It™ E3 Primer is a high performance single package epoxy primer that offers excellent corrosion resistance and adhesion qualities that are unsurpassed. This product may be used on bare metal as well as milled aluminum finishes.

All of these great products, may be applied by electrostatic, conventional or airless spray.
